

Katalog der Gummiprodukte 2026

Sehr geehrte Kunden,

In unserem neuen Katalog für das Jahr 2026 finden Sie unter anderem 525 neue Profiltypen, die unser aktuelles Sortiment auf mehr als 3070 Artikel erweitern. Unser Unternehmen wird damit weiterhin seine Position als Hersteller von Gummiprofilen mit dem breitesten Sortiment in der Tschechischen Republik behaupten. Sollten Sie das gewünschte Profil nicht in unserem Katalog finden, fertigen wir es gerne individuell nach Ihren Wünschen für Sie an. Ein Bild, eine Zeichnung oder ein kleines Muster des Originalprofils reichen uns aus. Das alles können wir in wenigen Tagen mit einer Mindestproduktionsmenge von 1 kg erledigen, einschließlich der Konstruktion und Produktion der Extrusionsdüse direkt im Haus. Wenn Sie sich nicht sicher sind, zögern Sie nicht, uns um Rat zu bitten. Aufgrund unserer langjährigen Erfahrung empfehlen wir Ihnen die passende Profilart und Mischung für Ihren Bedarf.

Ing. Martin Kománek, Geschäftsführer

KORDPLAST – Gummi direkt vom Hersteller

Wie bestellt man unsere Profile oder Ringe?

Alle Profile werden im Auftrag hergestellt. Die Mindestmenge beträgt 1 kg Profile oder Ringe.

Die standardmäßige Lieferfrist beträgt ca. zwei bis drei Wochen oder nach Absprache.

Wir geben Ihnen gerne die Preise der Profile auf Anfrage.

Bestellungen können per E-Mail gesendet werden.

(Der Verkehr nach Deutschland und Österreich für ein Paket bis 20kg beträgt 18EUR).

GUMMI

Wir beschäftigen uns mit folgenden Aktivitäten:

Auftragsproduktion von Profilen und Schläuchen.

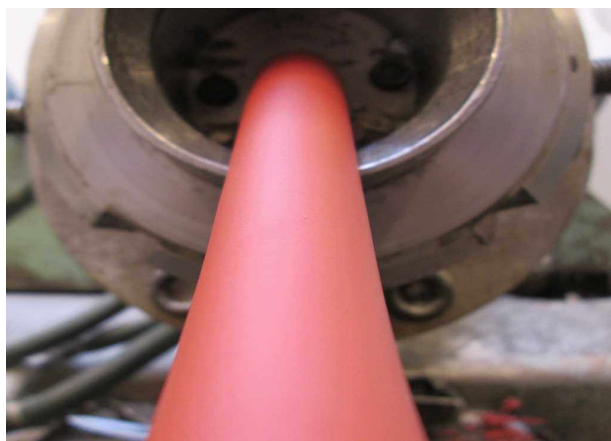

Produktion ab 1 kg Produkt. Auf der Grundlage von Zeichnungen, Biskumentationen oder anhand einfacher Zeichnungen führen wir komplette Gummi-Maschinenproduktion durch, von Preisangebot, Konstruktionsentwurf der Form, Bestimmung des technologischen Verfahrens, Eigenproduktion, technische Abnahme, Verpackung bis hin zur Auslieferung. Die Formen erstellen wir selbst, was die Liefertermine der fertigen Produkte beschleunigt. Wir verfügen über moderne technische Maschinen zur Herstellung von beliebigen Profilformen.

Produktion von Gummidichtungen für anspruchsvolle Anwendungen.

Wir helfen Ihnen bei der Auswahl und entwerfen Gummi beständig gegen Chemikalien, Benzin, Temperaturen, Alterung usw. Zu diesem Zweck arbeiten wir mit führenden tschechischen Lieferanten von Gummimischungen zusammen. In Kombination mit elektronisch gesteuertem Vulkanisationsprozess wird maximale Qualität und Homogenität der GummiProdukte erzielt.

Maßgenauigkeit und Qualität nach der Norm ČSN ISO 3302-1. Zu den Prioritäten unseres Unternehmens gehört immer die Kundenzufriedenheit. Dies erreicht man durch die strikte Einhaltung von vorgeschriebenen Toleranzen in allen Phasen der Produktion.

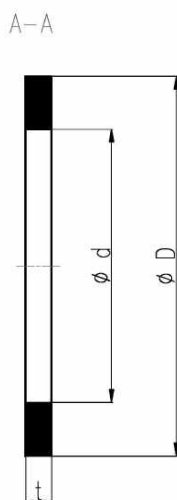

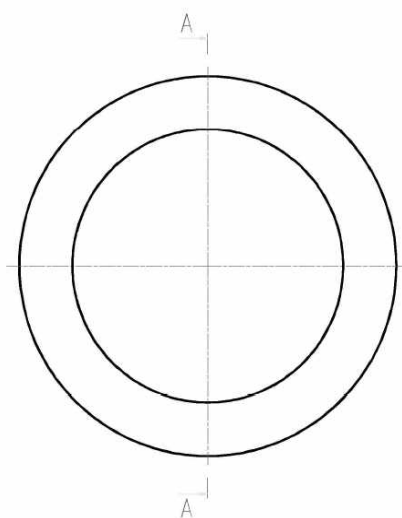

Zuschnitte von Gummimatten nach Kundenwunsch, Kürzen und Verkleben von Profilen.

Zum Schneiden von Gummimatten verfügen wir über eine neue Maschine, die Abmessungen bis zu 60x60mm und Härte 80ShA trennt. Matten einfacher Formen fertigen wir auch in Dutzenden Stücken, wobei der Preis deutlich niedriger als bei extrudierten Produkten ist. Wir sind in der Lage die Profile auf jede Länge zu kürzen, oder umgekehrt in geschlossene Schleifen mit speziellen flexiblen Gummiklebstoffen zu kleben.

Gummiringe

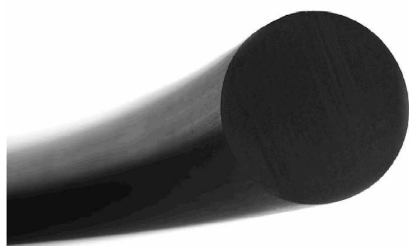

Ø D max. ≈ 115mm

Ø d min. = 2mm

t min. = 1mm

Gummiringe fertigen wir durch ein Trennen aus hergestellten Schläuchen. Der Querschnitt der Ringe ist rechteckig. Wir sind in der Lage diese Ringe in beliebigen Größen zu fertigen, und dies bis zu einem Durchmesser von 115mm. Über diesen Maß können wir verklebte Ringe herstellen. Diese Ausführung ist nicht mehr durch die Größe begrenzt. Wir haben derzeit ein Portfolio mit 1200 Gummiringen in verschiedenen Größen und aus verschiedenen Rohstoffen. Bei der Produktion von neuen Gummiringen ist es nicht erforderlich eine neue Röhrenform zu erstellen. Die Dicke der Ringe beginnt bei 1mm, die Obergrenze ist frei.

Kreisförmige Profile, Schläuche.

Kreisförmige Profile und Schläuche fertigen wir ebenfalls in beliebigen Größen und bis zu Abmessungen von ca. 115mm. Sowie bei Ringen ist die Produktion von kreisförmigen Profilen nicht mit zusätzlichen Kosten für die Röhrenformen verbunden.

Toleranz von Gummiprodukten

Die Maßtoleranzen unserer Produkte basieren auf der Norm ČSN ISO 3302-1. Gummiprodukte produzieren wir standardmäßig nach den Toleranzklassen E3, EN3, EG2. Nach Wunsch können wir unsere Produkte auch in genaueren Toleranzklassen fertigen.

Hier sind ausgewählte Toleranzklassen angeführt.
